

Perimeter Pest

Do You Have Uninvited Guests in Your Home?

Protect your home from uninvited invaders with a barrier treatment around your home's perimeter. Scotts LawnService will provide an insect shield that will control such pests as ants, silverfish, spiders and more before they have a chance to enter. Our 5 visit program is a proven way to enjoy the comforts of your home without dealing with these uninvited guests. Standard timing of these applications is early and late spring; early and late summer; and fall; however, applications may be started at any time. Schedule Perimeter Pest Control and receive \$15.00 off your first visit.

Mosquito

Are Mosquitoes a Problem?

Mosquitoes can make being outside unbearable. Let Scotts LawnService help make being outside pleasurable with our successful mosquito control program. It targets areas where mosquitoes breed and rest during the heat of the day. When you begin our 4-treatment Mosquito Program, receive half off your first treatment. Your remaining three applications will be scheduled at full price. Schedule your Mosquito treatment now and enjoy your yard again.

Flea & Tick

Keep small pests from becoming big problems!

Besides being a nuisance, common household fleas can cause a lot of itching, scratching and discomfort due to possible allergic flea bite-dermatitis. Ticks pose a greater risk annually. These dreaded bloodsuckers can transmit Lyme disease and Rocky Mountain spotted fever to pets and people, as well as cause tick paralysis in dogs. The standard timing of flea and tick applications is spring, early summer, late summer and fall. However, applications may be started at any time.

GrubEx™

Grubs Can Devastate Your Lawn!

White Grubs are June Beetle-larvae and have a three-year life cycle. In June, the Beetle lays eggs in the soil and within weeks, white grubs emerge to feed during the warm summer months – often causing extensive damage. They eat grass roots and garden crops. Food-seeking predators (such as moles, skunks, crows and blackbirds) often do further damage where grubs are present. Summer is a great time to control these devastating insects. We are now scheduling grub treatments for lawns and offering a \$30 discount off the regular price. We will help save your lawn.

Surface Feeder Insecticide

50% OFF Special To Protect Your Lawn!

Control these common summer pests: earwigs, spiders, ants and other surface-feeding, lawn-damaging insects. With this spring weather, expect a bumper crop of turf-damaging insects come summer. These insects can devastate a lawn within just a few weeks. The regular price of our insecticide treatment for your lawn would be \$99.80, but if applied in conjunction with summer fertilization, you get insect control for half price.

Spring Deep Root Feeding

We Care for Your Growing Investment!

Feed your trees and shrubs a balanced blend of nitrogen, phosphorous and potassium with our Spring Deep Root Fertilization. Let us provide the proper nutrients to maintain strong, healthy plants, vigorous root development and active growth throughout this season.
