

About Us

Turf Wizardss is one of North Carolina's premier lawn care companies. The staff at Turf Wizardss takes great pride in our work. You deserve a beautiful, healthy lawn that is free of disease and insects and we work our hardest to make sure you have just that! We use the latest technology and professional-grade products to make sure your lawn gets the most out of every application.

Services

Fertilization

Fertilizing your lawn is an exact science that should be handled by educated and trained professionals if you want ideal results. Our technicians will assess your lawn and prescribe the best fertilization regimen for your turf, giving you a bright, beautiful lawn that will be the envy of the entire neighborhood.

Weed Control

Weeds are not only aesthetically unpleasant, but they can also have a detrimental effect on your lawn. Our weed control program will stop new weeds from developing and spot treat existing weeds before they have a chance to spread.

Aeration

Aeration is a vital process to your lawn care program. By aerating the soil, your lawn has a chance to grow faster, greener and healthier than if the soil was compacted, which would restrict the amount of air, nutrients and water that reaches the root zone.

Seeding

Seeding is often performed in conjunction with aeration. We'll introduce new strains of grass to give your lawn a fresh, youthful appearance.

Insect Control

Insects are natural aerators, but there are some that can do more damage than good. Turf Wizards will protect your turf from these lawn-destroying insects and wipe out existing populations. Without proper insect control, your turf may be completely destroyed, resulting in thousands of dollars in restorative costs.
